

Assess your skills

As you begin your career here, it is helpful to quickly determine how your experience aligns with your new role and where you need to enhance your skills to be successful in our consulting practice.

Start with the **W2DC Development Navigator** for [consultants](#) or [analysts](#). This tool presents you with real life scenarios you can expect to encounter at Deloitte in your role.

Per scenario, you will be asked to:

- Think about how you would naturally respond in that situation
- Review the Deloitte recommended approach
- Rate yourself on how well you are currently prepared to respond using the Deloitte Way

The tool will then produce a customized report, based on your input, that recommends professional development to help you quickly improve the Deloitte-specific skills and knowledge you need to be successful at this level. **Don't delay - pursue these personalized development recommendations to help build your skills.**

You can source and track the recommended training through [My Development Plan](#).
